5/24/76

Dear Greg Pepetone,

The phlebitis was severe, leaving permanent, limiting damage. Otherwise I seem to be okay.

Thanks for Observer article.

Book separately

In both Houses of Congress there has been much messing around, fruitless or xxxxterproductive effort. However, there does seem to be some pressure in the Senate. What remains to be seen is whether it will be responsible or another whitewash.

Anson's book is a commercialization of the ripping off of the work of others to which, under a commercial formula, he has added what his own efforts failed to prove in any way. This kind of work is not helpful, does deceive many.

Considering my limitations, not being able to go around promoting it or to advertise it, Post Mortem is doing okay. No reviews at all.

My reporting of the FBI on the speed of the Z camera is accurate. The FBI was not. Later I was able to obtain a duplicate of that camera. It has no 24fps setting but leaves questions open because it slides from normal into 48fps. No switch. A single control. Slides easily with slight motion or pressure.

CBS work, not with that camera. not meaningful.

We feel alike about JFK. Maybe that's why he was killed.

Thanks for the personal comment.

Sincerely,

Harold Weisberg
